

DIESEL EMISSIONS SYSTEM CLEANING AND MAINTENANCE

Run clean. Run efficiently. Save money.

For all-makes trucks and heavy equipment at

Maudlin International
Helps keep your trucks and heavy equipment running cleanly and efficiently—all at a lower cost!

Call to schedule a DPF cleaning with one of our service professionals today!

Proper Diesel Particulate Filter (DPF) cleaning at the recommended manufacturer intervals — and when indicated — will help your trucks run clean, run efficiently and save you money.

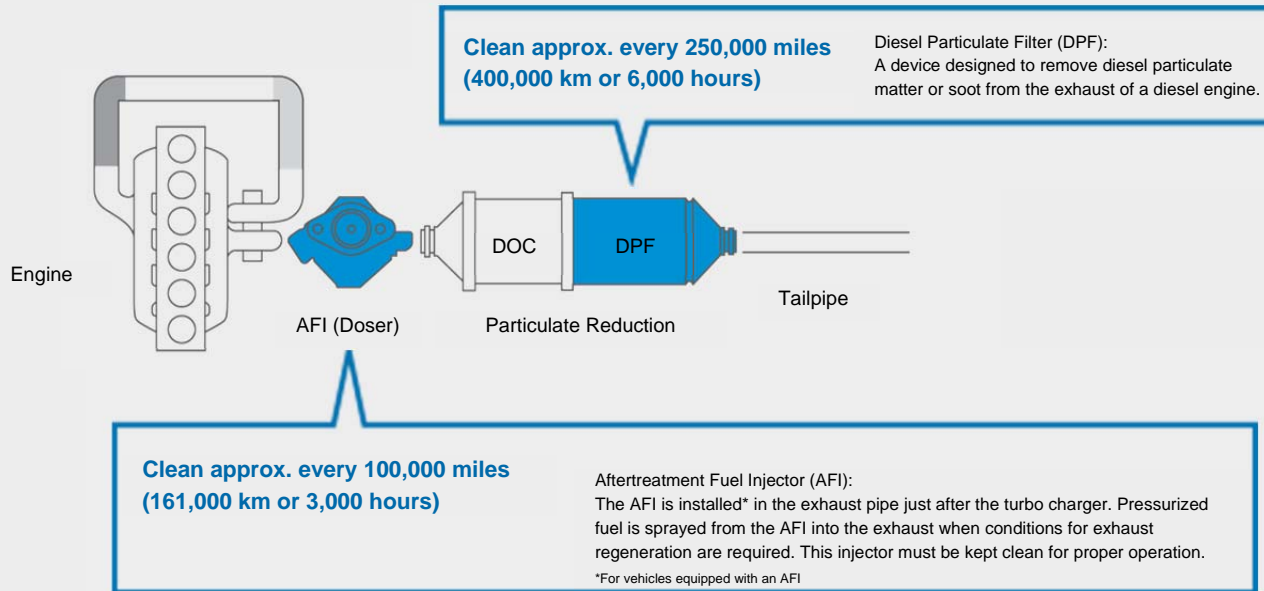

KNOW THE FACTS ABOUT DPF CLEANING!

- Fact:** The Diesel Particulate Filter (DPF) on all 2007 and later engines must be cleaned at proper intervals of 250,000* miles (400,000 km or 6,000 hours) or less depending on duty cycle and manufacturers' recommendations.
- Fact:** Many 2007 and later engines also have an Aftertreatment Fuel Injector (AFI), or doser, that is part of the exhaust system. Manufacturers recommend cleaning this component at approximately 100,000 miles (161,000 km or 3,000 hours) to prevent premature ash build-up in the DPF (see page 2).
- Fact:** Left unchecked, soot and ash collected in a DPF can damage or destroy a filter — resulting in a DPF replacement cost of \$3,000 or more and unwanted, unscheduled downtime.
- Fact:** Our specialized equipment can thoroughly clean a DPF, restoring the engine to full power and efficiency.
- Fact:** DPF cleaning services are available for all-makes trucks and heavy equipment at **Maudlin International Trucks**.

*Based on engine model/make and operating conditions

DIESEL EMISSIONS SYSTEM CLEANING AND MAINTENANCE

Run clean. Run efficiently. Save money.

DPF Cleaning

Don't clog your Diesel Particulate Filter (DPF). Following the DPF cleaning recommendations will help prevent the costly replacement of your DPF.

\$250.00*

**Includes: cleaning only (carry in)
Most engines models**

DPF Cleaning

Don't clog your Diesel Particulate Filter (DPF). Following the DPF cleaning recommendations will help prevent the costly replacement of your DPF.

\$400.00*

**Includes: Removal, cleaning, installation and gaskets —
most engines models**

AFI (Doser) Cleaning

Extend the life of your emissions system by cleaning your Aftertreatment Fuel Injector (Doser) that is found on most engine configurations.

\$100.00

**Includes: Removal, cleaning and installation —
most engines models**

Exhaust Tune-up

Includes both AFI and DPF cleaning services above as well as a complete inspection on all clamps and flex pipes.

\$500.00*

***ADD \$150.00 FOR BAKING IF REQUIRED**
